# Agrilytics: The future of farming in the palm of your hand.

SCAN THIS QR CODE TO  
EXPLORE OUR WEBSITE!

**Agrilytics**

Precision Agriculture

Agrilytics keeps your farm connected – forecast yields, track inputs, secure assets and streamline operations, all in one platform. We aim to bridge the gap between Farmers/Agri Businesses and their technological needs, delivering real-time farm management data and employing advanced analytics for risk assessment and mitigation, as well as building bespoke applications. Below are a few of the many modules we offer, our website lists the rest with in depth details on each module.

## THE KEY TO MOBILITY

Ametros provides an innovative technological solution designed to enhance calcium mobility within plant tissues, mitigate the impact of abiotic stress conditions on plants, and significantly improve both yield and quality.

### CaT technology?

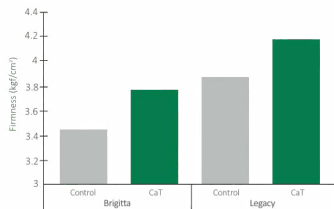

The patented product (CaT technology) utilizes a unique formulation of bioactive compounds that actively stimulate plant defence mechanisms, promote optimal nutrient uptake, and ensure efficient calcium transport to vital plant tissues, e.g. flowers and fruit/pods, even under adverse environmental conditions.

Tomatoes - 18 days storage difference. Left treated with Ametros

Ametros increases fruit firmness in Blueberries.

### Product Benefits

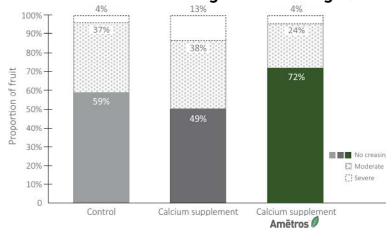

Improved crop quality, storage and shelf-life

Reduction of calcium related disorders

Less crop waste and more marketable yield

Compatibility with other AgChem foliar sprays

Ametros reduces creasing in sweet oranges.

# Testing & Advisory Services for Agriculture

With Cropnuts DRIS technology, OneSoil VRA and Integrated Agronomy Support empowers you to:

**DRIS** - Integrated Sap and plant tissue testing, providing real-time nutrient balance insights and enabling faster correction of deficiencies before they impact yield.

**OneSoil VRA** - Reduce fertilizer costs while improving yield through precise, satellite-guided variable rate application with 3x3 m resolution.

**Integrated Agronomy Support** - Combine all these tools for data-driven recommendations that boost yields, reduce costs, and build healthier, more resilient fields.

# Greenyard

## Agrochemicals

### LEVITY CROP SCIENCE PIONEERING FERTILIZERS:

Registered & distributed in  
Zimbabwe by Greenyard  
Agrochemicals:

*Albina, Damu, Elona,  
Indra Plus, Lono K,  
Lono Plus, Sulis, Zeme*

**FOR STRONGER HEALTHIER CROPS**

## KEY BENEFITS

#### LONO

- Increased flower, fruit & tuber numbers
- Improved fruit & tuber size
- More even size distribution
- Improved growth during stress
- Better fruit quality
- Transplant establishment
- Increased Root Growth

#### ALBINA

- Firmer fruit
- Increased flower & fruit setting
- Extended post-harvest shelf life
- Reduced physiological disorders
- Reduced susceptibility to disease
- Improved growth during heat & cold stress
- Highly Efficient Calcium Absorption

#### INDRA

- Protects plants from heat, drought, cold, salinity & UV
- Promotes antioxidants
- Improves flavour and colour
- Improved maturity in high UV growing conditions
- Reduces disease susceptibility

#### SULIS

- Improved colour formation
- Improved brix levels
- Better fruit firmness
- Earlier harvest (faster maturation)

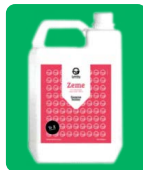

#### DAMU

- Better grading
- Improved bulking of root crops
- Higher marketable yield
- Increased fruit, pod and tuber size

#### ELONA

- Enhanced Delivery of Nutrients
- Improved rooting & establishment
- Strong tiller development
- Improved growth during stress

#### ZEME

- Strengthens the whole plant making it more resilient.
- Faster growth
- Stress tolerance
- Improves post-harvest shelf life

# InspiraFarms

## COOLING

At InspiraFarms Cooling, we design and deliver state-of-the-art cold storage and packhouse solutions that enable agribusinesses, exporters, and food distributors to reduce losses, extend shelf life, lower energy costs, and access new markets.

Our solutions include:

- ✓ Pre-cooling & cold rooms – extending shelf life and ensuring quality.
- ✓ Energy-efficient designs – combining solar-hybrid technology for cost savings.
- ✓ Modular packhouses – tailored to meet international standards.
- ✓ Comprehensive support – from installation and training to after-sales service.

With operations across Africa, including Zimbabwe, InspiraFarms Cooling is the trusted partner for businesses looking to scale sustainably, comply with export requirements, and deliver fresher produce from farm to fork.

Contact us today to discover how our innovative cooling solutions can transform your agribusiness.

## Melon Athena

- Popular, disease-resistant hybrid cantaloupe known for its exceptional sweetness
- Firm texture, and long shelf life, making it a favorite for growers and consumers.
- Featuring netted rind and rich, orange flesh that stays delicious even when left on the vine, offering dependable performance for a summer-long harvest.

## Cucumber Brilliant

- An early Monoecious hybrid cucumber, that can be picked over an extended period.
- Dark green fruit with white spines
- Days to maturity: 50-60 days.

## Cabbage Dephine

- An early-maturing hybrid cabbage for both summer and winter slots.
- Very good heat tolerance. The cabbage has got an attractive blue green color which is highly sought after by market agents and hawkers.

For Livelihoods. For Sustainability.

GLOBALG.A.P.

## GET GLOBALG.A.P. CERTIFICATION

GLOBALG.A.P. Certification is an assurance to your customers that your product has been produced in a way that values food safety, environmental stewardship and social responsibility. The certification helps you, as a farmer, to expand your market reach for your horticultural products. The process of achieving certification may appear scary in its complexity and cost implications.

TIMB, as a Registered Trainer and GLOBALG.A.P. Community Member, can help you achieve your certification.

- ✓ Do not be scared by the costs, TIMB has a plan that is friendly to your pocket.
- ✓ Do not be scared about your location, TIMB is almost everywhere in Zimbabwe.
- ✓ Do not worry about where to start from, TIMB will assist you in setting up a viable farming enterprise or improve your farm profitability.
- ✓ Do not be scared by the complexity of the process, TIMB's highly qualified Consultants will demystify the process for you.

TIMB is determined to have a carbon neutral industry through sustainable agricultural practices.

# WHY JOIN THE

## HORTICULTURAL DEVELOPMENT COUNCIL (HDC)

**Join HDC today and be part  
of a thriving, professional  
horticulture network.**

Mamvura House, Bluff Hill  
Industrial Park, 35 Kenmark  
Crescent, Bluff Hill, Harare  
Tel: +263 771 056 375  
Email: [info@hdczim.com](mailto:info@hdczim.com)

Whether you're a farmer or part of the agriculture value chain, joining HDC comes with great benefits that help your operations grow. Here are the benefits of being part of HDC:

### **Are you a farmer?**

- > Access market trends and connect directly with buyers
- > Receive training to grow your skills
- > Gain support in accessing finance and credit
- > Expert support to improve your yields
- > Be part of a network of growers
- > Make your voice heard on key policies

### **Are you an aggregator or transporter?**

- > Reach a wide network of farmers and suppliers through HDC platforms
- > Opportunity for shared logistics
- > Get training and access to information on finance
- > Gain support on regulatory issues

### **Are you an input supplier?**

- > Reach more farmers and boost your sales
- > Get market access and connect with aggregators
- > Access training, finance, and advocacy
- > Join a growing network of serious industry players
